

Simplifying PI Planning across ARTs

Plan and execute your PI in a single enterprise application

Better Collaboration Starts Today

Increased visibility

- Clear feature status
- Easy dependency management
- Customized visualization

Real-time synchronization

- Seamless global participation
- Select ALM tool integration
- Dependency communication

Focused Agile Teams

- Single source of truth
- Simplified interface
- Advanced filtering

Gain the visibility and focus your teams need for effective PI planning

Do these PI planning challenges sound familiar?

- You can't easily tell which features have been planned
- You don't know if you're aligned with the other ARTs
- Your teams' cognitive load makes it difficult for them to get started
- You have to continue checking and updating your ALM tool
- You need to be everywhere at once, but it's impossible

piplanning.io solves them by aligning PI planning and execution across ARTs.

Multi-ART alignment

Features, epics, and user stories immediately sync across multiple ART boards

ALM tool integration

Effortless, real-time, bi-directional sync with Jira, Rally, or Microsoft Azure DevOps

Enterprise-trusted application

Used by STEs and RTEs at some of the largest Lean-Agile organizations

“For me, it was 50 percent less stressful planning for PI planning because the tool provided the foundation and consistency I knew we needed.”

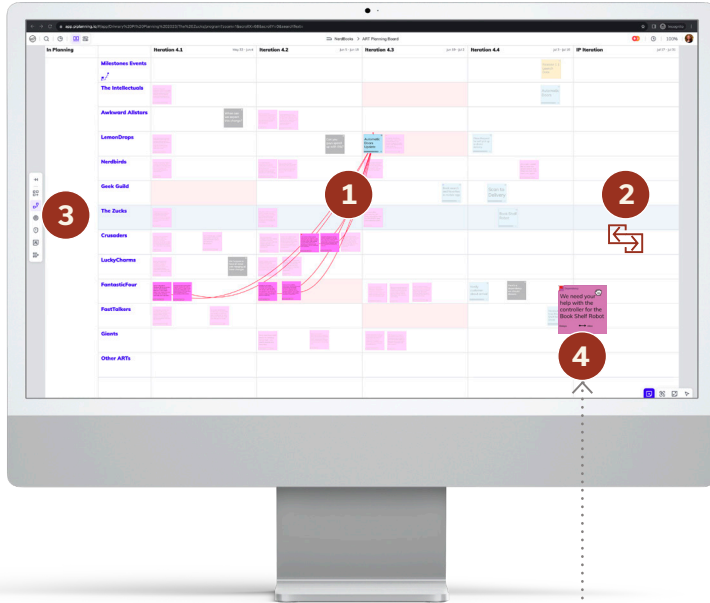

→ [Hear](#) from Sabrina Gruttadauria, RTE, **AmerisourceBergen**

piplanning.io has multiple boards, like ART, Team, Risk, and Backlog. See examples of the ART and Team boards.

Aligning PI Planning and PI Execution across ARTs

piplanning.io is a single-source enterprise application that reduces complexity, adds transparency, and improves alignment in PI planning and PI execution, especially in distributed environments.

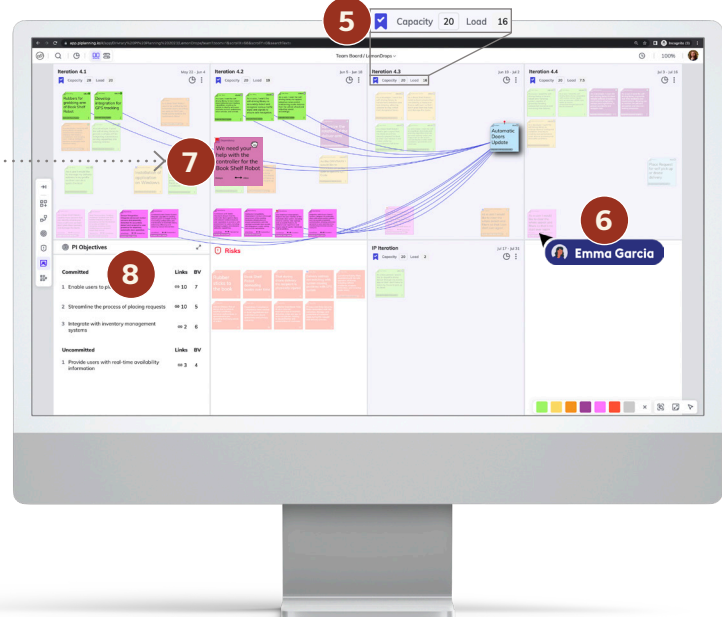

ART Board

- 1 Manage dependencies in real-time:** With quick filters and dependency strings, you can quickly visualize and highlight team and ART dependencies
- 2 Keep everyone on the same page:** Experience the benefits of in-person collaboration, virtually, with real-time synced boards and select ALM integration
- 3 Customize your organization's view:** Define structure, set up teams, and more in the RTE Cockpit
- 4 Increase transparency:** Mirroring instantly shares stickies across teams and ARTs in various contexts

- 5 Strike the right balance:** Easily see capacity vs. load and new feature vs. technical debt to determine necessary adjustments
- 6 Clearly articulate ideas:** Direct teammates to specific areas on the board with pointer
- 7 Automatically handle dependencies:** When a dependency is detected, instantly send a dependency sticky to another team board
- 8 Empower teams in breakouts:** Everything teams need, including PI Objectives and Risks, fits on the team board

Team Board

The enterprise application that easily scales to fit your organization's PI Planning and execution needs.
